

7. Strategies to be taken as Japan

2) What is expected in the industry and issues

1. Accelerate development of “innovative” technology

- Development of Innovative technology is mentioned in the COP
 - As a concrete task, considerable hurdles are very high and mid or long-term perspective is indispensable
- We will also make use of countermeasures such as collaboration among industry, government and academia, incentives etc.

2. Acceleration of dissemination of environmental-friendly products such as high-performance equipment

- Increased incentive needs for accelerating dissemination
- The cooperation of public and private efforts
- Specific measures based on “Overview of the plan for Global Warming Countermeasures”(Cabinet Decision in May 2016)
